

FOR IMMEDIATE RELEASE

## Inango Systems Announces Release of Inango Toolbox: A Suite of Integrated Software Development Tools

**KFAR-SABA, ISRAEL – June 12, 2018** – Inango Systems announces the release of Inango Toolbox, a suite of integrated software development tools enabling companies to speed up their software development process to drive faster time to market while keeping tight control on features, versions, work tasks and their statuses.

“As a provider of software products and professional services to numerous companies, it was imperative that our software development process be highly organized and very efficient, yet cost effective” said Jonathan Masel, CEO of Inango Systems. “We took field-proven tools, customized them for our needs and have created a smooth, seamless software development flow that is ready for immediate deployment. It is an excellent way for us and other small to medium sized companies to utilize the power of many open-source tools, yet save months of work integrating, deploying and testing them.”

Inango Toolbox covers all aspects of the software development cycle, from design, bug and feature tracking, code reviews, version control to continuous integration. The tools are integrated via scripts and add-ons developed by Inango Systems, but being based on open-source code, Inango can offer them for an incredibly cheap prices: from a US\$2,000 one-time fee per server (with unlimited use per server). They may be used for internal development teams as well as for external partners or customers to track issues that are of interest to them. Inango also offers an optional extension called ZIKIT for automated testing.

Inango Toolbox is highly configurable allowing customers to tailor it to their own needs that will save them time and money in the definition, installation, integration, configuring and testing of the individual tools themselves. By incorporating industry proven tools and working with Inango, you can accelerate your software development efforts by basing your work tools on the Inango Toolbox.

### About Inango Systems

Inango Systems develops software for a broad range of communication applications. The company offers licensed source code solutions and provides software professional services for customized feature development as well as an extension to customer’s own software teams. Inango’s customers include OEMs in the networking and telecommunication markets and semiconductor companies who benefit from Inango’s experience in providing highly optimized software-to-silicon solutions. Inango software is installed in millions of homes and networks worldwide.
